The American nation forbids any man to be its President until he shall have arrived at least at the age of thirty-five. Before that, his youth and his immaturity unfit him for the grave responsibilities of his position of trust. One of the most amazing things about Jesus was his comparative youth. At the age of thirty he offered himself as the Saviour of the race, destined to sway centuries to come, and at the age of thirty-three declared his work to be finished. On Christmas Sunday, Mr. Jones will preach on the words—"Unto us a Son is given and the government shall be upon his shoulder." The sermon is entitled, "The Rule of the Young Man."

## Politics Is Played Against Health in Philippine Islands

MANILA, P. I., Nov. 25—(Associated Press Mail)—Governor General Wood has started an intensive campaign to improve health conditions in the Philippine Islands by teaching the people how to avoid and combat the most common diseases which sap the vitality of the country. He has instructed the director of the Philippine health service to prepare a circular setting forth the causes of various diseases and the methods which can be used to prevent them and stamp them out. The circulars are to be posted in public places in every municipality of the islands, and are to be read to every class in the public schools throughout the archipelago.

### Saving Baby Lives

"We must spare no effort to improve general health conditions in the islands," said General Wood. "We must especially pay attention to the need for combating infant mortality. We must avoid unnecessary wastage of life."

Addressing the women's clubs of Manila, General Wood said: "Politics has been and still is being played against human life, but we are going to stop it here in the Philippines. We must have a centralized control of the sanitary system of the islands—one that will act without political hamperings. We need more hospitals throughout the islands, we need more nurses throughout the provinces."

"Two thirds of the babies who die in infancy could be saved. One third of all babies born, die in the first year and two thirds of these deaths are preventable. The sanitary system is responsible for many of the deaths. Undernourished mothers form the second great reason for the many deaths, and too much polished rice is the chief reason for undernourished mothers. More meat and vegetables and unpolished rice should be eaten."

### Necessities Shown

Governor General Wood mentioned four necessities for better living:

First—More hospitals throughout the provinces.

Second—More dispensaries in the provinces.

Third—Better distribution of medicines.

Fourth—Additional nurses in the islands.

"There are only 930 trained nurses in the islands—there are 900 municipalities—this is practically one nurse for every town," said the governor general. "We should have at least 5,000 trained nurses in the islands to care for mothers and to guard against plagues. With capable instruction infant mortality could be more than cut in half."

## Paris Autumn Salon Full of Surprises For Lovers of Art

PARIS, Nov. 10—(Associated Press Mail)—The Autumn Salon which has opened its 14th exhibition proclaims that it is "open to all formulas" and it has provided it by giving publicity to schools or crazes like, Cubism, Futurism and Dadaism. Extreme examples of these practices, however, are not prominent in this year's New Salon, Societe National des Beaux Arts, which strikes a note of modernity and of living effort that contrasts with the museum like effect produced by the older salons.

The effort is made to embrace every branch of art in addition to painting and sculpture. There are sections for books, music, the dance and fashions, the latter showing the latest creations of celebrated dressmakers.

This year two new sections have been added, those of moving pictures and the theater.

One room is devoted to a striking show of Russian art, another for a group of Belgian artists. American work, including exhibits by 50 artists is placed with that of the others in general, as it would be difficult to give a room to each of the 27 countries represented.

No special picture has established itself as the picture of the exhibition. There has been more talk and more printed about a picture that is not on show, because the jury refused it, than about any other.

This rejected work is a portrait of Miss Maria Ricotti, an actress, one of the five portraits sent in by Kees van Dongen, whose portrait of Anatole France was a striking feature of the last New Salon. Judged by the reproductions in the press, this portrait was ruled out as being too normal to represent van Dongen. The dress is black and so give no room for the Dutch painter's striking color power, and the eyes seem almost natural in size instead of occupying a third of the face as usual with this artist.

Another picture which the crowd is making sure of seeing is Francis Picabia's "Hot Eyes," which has also had the distinction of wide reproduction. Two concentric circles with circumferences outlined in color, occupy the upper half of the canvas, a hand is outlined below and a small circle with certain mathematical lines are placed between. Various things are written in paint across the canvas, much as lesser artists inscribe sentiments on walls.

Mr. Picabia, head of the Dadaists, until he excommunicated them some months ago, has another work of similar brilliancy, called for some reason, "The Cacydolyte Eye," which is entirely in writing except for a photograph of the artist of passport size, stuck on the canvas. Mr. Picabia now signs his work "Picabia, le Louist" or Buffoon.

A total of 6,900 works were offered for the Salon but only 2,500 places were available to hang them.

## Municipality Builds Apartment Houses for American Officers

COBLENZ, Nov. 25—(Associated Press Mail)—Apartment houses built by the municipality of Coblenz, aided by the German government, were opened recently for accommodation exclusively of officers of the American Forces in Germany and their families. The purpose of the houses is to relieve the crowded condition of the city which has been a problem ever since the Allied troops reached the Rhine.

There are 82 apartments of five rooms each and all modern conveniences, in the new buildings now being taken over by the American families. Work on these apartments was started about two years ago to alleviate, as the Germans put it, "an unbearable situation," as "no roof is large enough to cover two families." Additional quarters for non-commissioned officers and their families are also under construction.

Allied army officers say that the population of Coblenz perhaps has been harder pressed by the army requisition of quarters than any other occupied city. All available space for offices and billets has been under requisition for nearly three years, but German officials hope the new apartment houses will considerably improve the present crowded condition of the city.

In Coblenz there are about 3,000 rooms under requisition by the American army, the general policy of billeting being similar in all the zones as occupied by the French, British and Belgians. In the majority of cases, Allied families have been quartered in the same houses or apartments with German families, the Allied families occupying a separate part of the house so far as practicable and using the kitchen and bath in common with the German occupants.

As a consequence, disputes have arisen and the town major or billeting officer is often called upon to settle them. These disagreements almost invariably have their origin due to the joint use of the kitchen. Because of this difficulty, the policy has been universally adopted of installing wherever possible, a separate kitchen for the Allied family.

Generally, when a house or apartment has been taken over, the Germans have been permitted to take their furniture and personal belongings with them. In the American area it is stated, however, that only in exceptional cases have Germans been required to vacate their homes or apartments entirely. One eight room school building in Coblenz was requisitioned exclusively for children of American officers.
